

Motore di sintesi "B67 ZEN FM" (4 operatori con FM lineare + 4 wave shapes) per tutti gli strumenti Roland che supportano lo standard ZEN-Core: nuovo editor e sound collection.

E' disponibile il **nuovo software ZEN-Core Editor Librarian V2.0** (PC e MAC) per i sintetizzatori Roland della famiglia Phantom, AX-Edge e Jupiter-X che tra le tante novità permette l'editing di un nuovo motore di sintesi, perfettamente compatibile con lo standard ZEN-Core, che utilizza **la sintesi FM lineare (4 operatori) e 4 modulable waveshapes degli operatori.**

Il motore di sintesi **"B67 ZEN FM"**, è ottenuto tramite una implementazione particolare di un tono ZEN-Core in cui viene permesso l'accesso solo ad un numero limitato dei parametri di tale sintesi, lasciando predefiniti e non accessibili gli altri (es. Structure 1-2/3-4 = XMOD2, Osc Type= VA).

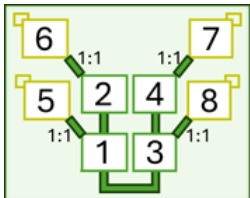

In particolare la matrice di modulazione è "bloccata" con parametri Source e Destination predefiniti così da garantire le modulazioni corrette che operano sui principali parametri di sintesi della FM.

L'editing real-time lo si effettua in una nuova pagina che contiene tutti i parametri di sintesi, le frequenze degli operatori settabili tramite il parametro Freq. Ratio (0.25, 0.5, 0.78, 1, 1.5, 1.57, 1.78, 2, 3, 3.5, 4, 5 16), le waveform (SIN, SIN2, TRI, TRI2, TRI3, SAW, SQR, RAMP, JUNO)), la visualizzazione grafica degli 8 involucri (4 per la FM e 4 per gli shape), un librarian dedicato (2048 suoni), 20 tone presets, 8 ENV presets, una clipboard e la possibilità di effettuare il copia e incolla dei parametri di sintesi.

Ad ogni suono è associato uno dei 93 multieffetti MFX, editabile nella sezione dedicata.

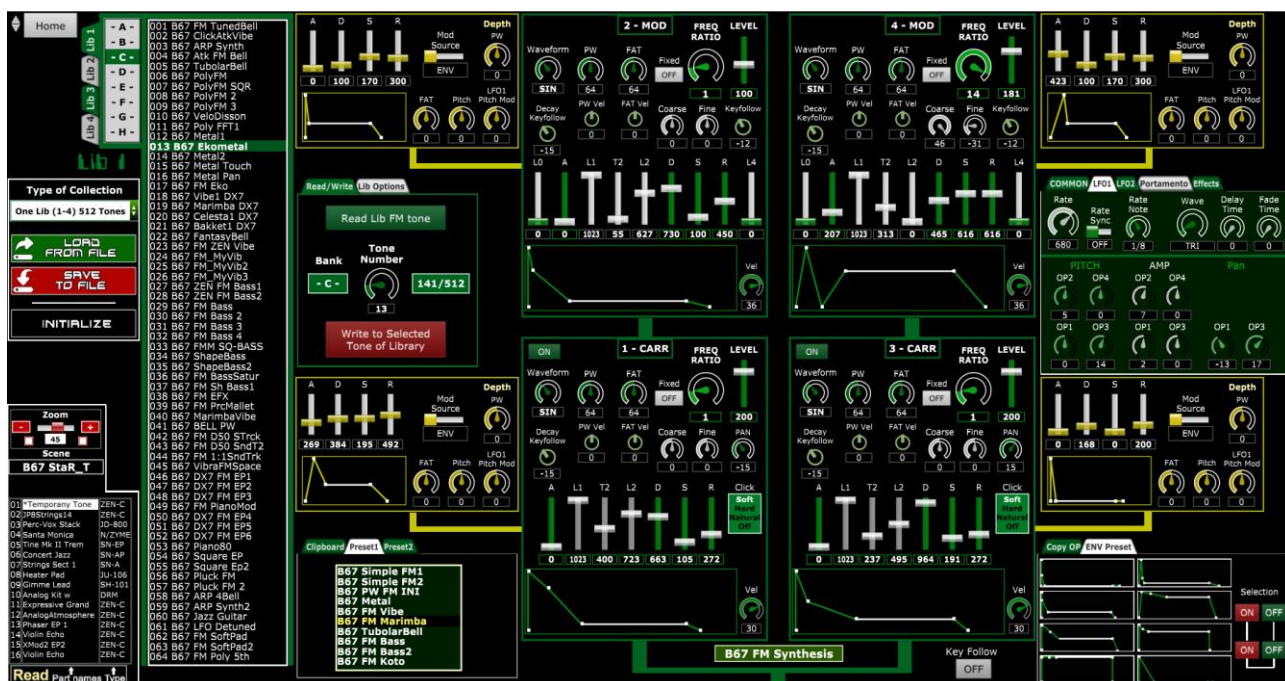

Applicando la modellazione delle forme d'onda ai 4 operatori (tramite i parametri FAT e PW) e modulandoli con 4 ENV dedicati, il motore di sintesi è in grado di replicare la sintesi a distorsione di fase (PD) famosa nei sintetizzatori Casio CZ.

Nel caso in cui si usano oscillatori sinusoidali e si modula il PW con gli ENV ADSR dedicati, si ottiene nel complesso una struttura di sintesi analoga a quella di un algoritmo FM con 8 operatori come nell'immagine: 4 operatori (1,2,3 e 4) sono liberamente configurabili nella frequenza, mentre gli altri 4 modulano i corrispondenti operatori portanti e modulanti con un ratio 1:1.

La polifonia è di 22 voci per tutti i sintetizzatori, pianoforti, keyboard, Wind-Instruments, Guitar Synth e Virtual compatibili con lo standard ZEN-Core: si riduce ad 11 voci nelle groovebox MC-101, MC-707, VERSELAB MV-1.

L'editing grafico semplificato di tutti i parametri, la gestione dei suoni tramite librarian e il richiamo dei parametri per editing successivi è possibile solo tramite ZEN-Core Editor Librarian V2.0.

E' disponibile anche la nuova B67 ZEN-Core Collection 3 (197 toni ZEN-Core complessivi) che include 112 tones creati con il motore di sintesi "B67 ZEN-FM".

Grazie alla totale compatibilità con lo standard ZEN-Core è **possibile utilizzare tali suoni su tutti gli strumenti e i virtual compatibili**: Zenology Pro, Zenbeats (ZC-1), FP-E50, RD-88, RD-08, Juno-D, Juno-X, V-Stage, MC-101, MC-707, Verselab MV-1, GM-800, Aerophone AE-20 Pro AE-30, GO:KEYS 5, GO:KEYS 3.

Insieme alla collection, per i suoni con il motore di sintesi B67 ZEN-FM, viene fornita anche il file nel formato proprietario editabile e gestibile all'interno della sezione dell'Editor/Librarian V2.0, disponibile per Fantom, AX-Edge, e Jupiter-X/Xm.

Tra i vari suoni della collection, realizzati con tale sintesi sono presenti le emulazioni di alcuni suoni "classici" **dello Yamaha DX7"** (Marimba, Vibe, Celesta, Bakket, Jazz Guitar, Tubolar Bell, EPiano, Bowed Strings, Brass, Synth Bass, Metal..) e suoni originali che utilizzano la sintesi FM e Wave Shape per suoni inediti con spettri armonici complessi e in evoluzione.

L'upgrade alla versione 2.0 dei ZEN-Core Editor Librarian per Fantom, AX-Edge e Jupiter-X è gratuita (la si trova nella repository di gumroad o payhip di chi la ha acquistata).

La collection 3 (197 ZEN-Core tones comprendenti 112 creati con il motore di sintesi B67 ZEN-FM) è disponibile singolarmente, nella versione "best of" e in bundle con altre collection e editor.
